

# ninô

ninô by **AURES** is a next-generation integrated touchscreen EPOS system, one of the world's smallest POS terminals. In today's hospitality and retail markets where space equates to cost, ninô's ultra-compact design and small footprint are particularly welcome.

A unique swing arm delivers adjustable heights and viewing angles from flat up to 90°, perfect for environments that require unobtrusive EPOS. Counter-top-, wall- or pole-mounting are also possible, which all add to ninô's versatility and flexibility.

The neat 14" LED-backlit touchscreen (16:9 wide aspect) displays more on-screen data with exceptional clarity and can be True Flat Resistive or Projected Capacitive Touch for multi-touch and gesturing.

Snap-on coloured bezels and cable cases are a welcome option for clients keen to create a fully-branded environment where technology blends into the décor.

Robust construction and convection-cooled fanless operation equip ninô to cope in the harshest of environments and leave it unaffected by high temperatures, grease, dust or sea air.

ninô utilises the latest Intel Atom Dual-Core Cedarview processor, combined with the Intel NM10 chipset to provide higher speeds using less power, together with 2 to 4GB of memory and a hard drive (HDD) - or optional Solid State drive (SSD), in a wide range of capacities.

*Small, compact and smart:* ninô is the ideal companion for all types of food and non-food retail outlets, and for food & beverage service environments ranging from quick-serve to fine-dining restaurants, bars and clubs.

## Benefits & technical specifications

### The first fully adjustable ultra-compact EPOS terminal

So small you can carry it, folded, under your arm  
VESA fixings for wall and pole mounting applications

### Ergonomic zero bezel screen

16:9 wide aspect  
True Flat Resistive or Projected Capacitive technologies

### Fanless & low power consumption EPOS unit

Intel Atom Cedarview D2550 processor  
with LED technology

2.5" SATA HDD or SSD (optional)

### Memory

SO-DIMM DDR3 x 2 - 2 to 4GB

### Multiple connection ports

4 serial ports, 4 USB ports, Display Port with HDMI,  
12V power out

### Optional accessories

Customer display, card & Dallas key readers, WIFI,  
dual-screen system, receipt printer...

### Colours

Grey as standard  
with other colours available upon special order

### Compatible OS

Windows XP Pro, Windows POSReady 2009,  
Windows 7 Pro, Windows POSReady 7, Linux
