# YUNO

robust, yet stylish and compact

# YUNO

**AURES**' YUNO is a fanless, compact, multi-function EPOS terminal, fitted with a Quad-Core Bay Trail J1900 platform. With its contemporary style and robust design, it is suitable for point of sale and service in any sector.

It is a stylish and flexible product, available in two screen formats (15" and 15.6" Wide aspect ratio). It offers a choice of VESA options for wall or pole installations, as well as the traditional stand mounting. The device is also available as a touchscreen monitor.

YUNO's precise multi-touch projected capacitive screen is shock- and scratch-proof (PCAP technology). The fanless design, coupled with the 64 GB SSD, ensures that this solid state drive remains dust and ingress free, ideal for those harsh retail environments.

The energy-efficient Bay Trail processor (*consuming just 10 W*) and the heat-dissipating aluminium structure of the product prevent overheating and ensure compliance with increasingly rigorous environmental standards (low carbon footprint).

YUNO is a reliable and accessible system, whose many benefits make it good value for money. It constitutes a sensible, cost-effective and long-term investment for your POS IT equipment.

## Other specifications

**Processor Bay Trail J1900**

**SSD 2,5'' 64 GB (2 slots)**

**4 GB RAM upgradeable to 8 GB**
